I do not recommend this game. It was given to me as a gift. It freezes a lot, and when it does work, it's not fun anyways.. Great game. Some things are literal exact copies from the first game, but all but one of the puzzles are new, and they are just as challenging as the first one. Worth a play if you liked Leaves 1.. No matter how many times I go back to these games, they never get old. Classics through and through.. Humorous VR game with multiple endings.

I wouldn't really say it's a puzzle game, not when the Ai tells you what to do most of the time, so there's nothing much to really figure out.

So if you go into it to just enjoy your time in the elevator you'll have fun, but if you expect hard puzzles then try elsewhere.

For some reason It wouldn't let me finish one of the endings with the helmet, I know what you're supposed to do but it won't do it on the Rift for me for some reason.

There's 4 episodes, wish there were more as I enjoyed it.. This game isn't bad for being early. Technial game. Look forward to other races and chapters. Few things I would like to see added.

1. Needs a map of the stars. The coordinates x,y,z for each system makes it hard to get places and get back.
2. Some of the lighting is dark. Real space is dark but it makes it hard to find things in the game.
3. The jump system is a mash of 2D and 3D and sometimes the HUD shows over the jump thingy.
4. The combat addition is cool but I found it hard to understand the specs on ships and weapons.

Some of the audio is quieter than others. Looking for these updates.. The game needs more work but for the price of \$30.95 it's not bad.. Great game :). Loks exactly like a NES game and even plays like one. Can't say how good it is though, have to play more. I am so bad at it and I didn't even finish the first level. Shame on me, huh?

Well that was a waste of a few quid! The game is entirely unplayable due to its difficulty setting which I started on "Piece of cake" the easiest setting. However after being killed 30 times in the first minute it became apparent this setting was super impossible. You die, restart and die immediately. One hit is enough to end your life. I used to play this loads and have completed it many times but I never remembered it being this difficult. The devs have ruined a perfectly good game because unless you like restarting every 2 seconds its unlikely this game will stay in your library. Stick with the original game as that was playable. This is a joke - not a very funny one at that.. Very good platformer game. Yeah I actually do recommend this game. It is a light hearted game with a little different twist to it, not complicated. The AI will trick you--a lot. Which makes it all that more fun when you beat them.

Not a stressful game.. Communication based puzzle solver.

Basically free to play version of Keep talking and nobody explodes.

Nice :). I played the originals over on Kongregate and I was thrilled when Cursed Treasure 2 appeared on Steam. The only reason this thing isn't more widely considered a gaming classic is because the torrent of lesser games smothers gems like these. Highly recommended, very charming, very polished and loads of fun! If you've got to play one tower defense game in your life, this is the one.. needs setup files like assetto corsa to be added so we can edit cars like on the game i love both the games but i really learnt my lesson with car x i\u2665\u2665\u2665\u2665\u2665\u2665\u2665off a dev n imm sry ... i can drift in assetto now ow n i just bort ya new dlc n i dnt even have the game installed anymore if just one person would come n ask me why i left i may of gone back but thy didnt :(
